IDAHO URBAN/RURAL CRIME IN 1999

U.S. Census Bureau defines urban as incorporated cities with a population of 2,500 or more. Rural is defined as cities with a population less than 2,500 and unincorporated county areas. County areas adjacent to a large city and with a population density of at least 1,000 persons per square mile may be considered urban based on percentage of urban/rural. The Department of Commerce provided data indicating urban/rural percentages for the counties of Idaho. For publication purposes, the reporting counties with an estimated 80% or more urbanization are calculated under the urban category in totality.
